22. Participation in all Networking Tools by Birth Year

23. Participation per Networking Tool by Birth Year

All graphs are based on expenditures (actuals) encoded in e-COST and therefore show in the participation graphs reimbursed participations only.

1. Participation – All activities: Share of participations per country in all activities implemented by the Action. COST countries not participating in the Action are summarised in other COST Countries (oCC).
2. Reimbursements – All activities: The share of reimbursements, which has been paid to participants from the respective countries for all activities. LOS is not considered. COST full or co-operating member countries not participating in the Action are summarised in other COST Countries (oCC).
3. Participation: Amount and share of participations per Networking Tool. LOS is not considered.
4. Budget Distribution: Budget in EUR and its share allocated to the different Networking tools so far with LOS and 1st MC meeting included.
- 5.-9.: Share of participations per country in the respective Networking Tool implemented by the Action. COST full or co-operating member countries not participating in the Action are summarised in other COST Countries (oCC).
10. Participations by Country Category: Share of participations of for non-ITC, ITC countries participating in the Action, Near Neighbour Countries (NNC) and International Partner Countries (IPC) for all Networking Tools. Participations from COST full or co-operating member Countries not participating in the Action are included in ITC and non-ITC.
11. to 15. Trend of participation by Country Category for the different Networking Tools: Participations per Networking Tool (bars) in total numbers over the lifetime of the Action. Inclusiveness is the ratio of reimbursed participants from ITC and NNC to all reimbursed participants. The x-axis of the trends displays always 5 Grant Periods (GP), independently of the age of the Action. This is to cover Actions starting with a shortened Grant Period due to their start date or to cover Action extensions. In the trend graph for Meeting also the 1st MC Meeting (MCM1) is included.
16. to 21. Participations by Gender: Share of participations of women, men and those, who did not declare their gender in all Networking Tools and the respective trends for each Networking Tool. x- Axis as for the graphs 11.-15.
22. Participation in all Networking Tools by Age: Share of participations in all Networking Tools per birth year cohort of 5 years. The category "Unknown" is caused a data parsing error in e-COST, which does not provide the birth year category for some rare cases.
